

Submersible pressure sensor

For superior applications

Model LF-1

WIKA data sheet LM 40.04

Applications

- Level measurement in vessel and storage systems
- Overfilling and no-load operation monitoring
- Level measurement in rivers and lakes
- Deep well and groundwater monitoring
- Battery-operated level measuring systems

Special features

- Suitable for measurements in contaminated and aggressive media
- An optimised discharge behaviour and a large pressure port prevent the instrument from clogging and ensure a minimum maintenance effort
- Can be used in explosion-protected areas
- Developed for wireless applications

Fig. left: With conduit and FEP cable
Fig. right: With PUR cable

Description

Permanently reliable

Extensive test cycles not only guarantee a permanent resistance and long service life in all commonly used oils and fuels, including aggressive crude oils and biofuels, but also in flowing and stagnant waters and in wastewater treatment applications.

Thanks to newly developed special cables, components made of high-alloyed stainless steel and an optional overvoltage protection against lightning, the submersible pressure sensor is perfectly suited for the measurement of liquid levels, also in the outdoor area.

Precise level and temperature measurement with HART® communication

A measurement uncertainty of max. 0.5 %, a long-term drift of 0.1 % and slight temperature errors make the LF-1 a reliable measurement solution for the monitoring of storage tanks and bodies of water.

The additional analogue temperature output facilitates the compensation of a temperature-induced density error especially at temperatures of up to $-40 \dots +80 \text{ °C}$ [$-40 \dots +176 \text{ °F}$].

The integrated HART® communication can be used for scaling the measuring range and for the parameterisation of unit, error signal, and others.

Optimised electronics for battery operation

The modern electronic system guarantees not only a high accuracy in the long term but also ensures a very long battery life thanks to low power supply, low current consumption, fast response time and low-power output signals.

Safety also in hazardous areas

The optional intrinsically safe electronic system is authorised according to the common international standards and allows a safe worldwide application in explosive gases and vapours.

Measuring ranges

Gauge pressure							
bar	0 ... 0.1	0 ... 0.16	0 ... 0.25	0 ... 0.4	0 ... 0.6	0 ... 1	0 ... 1.6
	0 ... 2.5	0 ... 4	0 ... 6				
inWC	0 ... 50	0 ... 100	0 ... 150	0 ... 250			
psi	0 ... 5	0 ... 10	0 ... 15	0 ... 25	0 ... 50	0 ... 100	
mH ₂ O	0 ... 1	0 ... 1.6	0 ... 2.5	0 ... 4	0 ... 6	0 ... 10	0 ... 16
	0 ... 25	0 ... 40	0 ... 60				

Absolute pressure							
bar	0 ... 1.6	0 ... 2.5	0 ... 4	0 ... 6			
psi	0 ... 25	0 ... 50	0 ... 100				

The given measuring ranges are also available in mbar, kPa and MPa.

Overload safety

≥ 3 times

Temperature measurement (option)

Measuring ranges	
Option 1	-10 ... +50 °C [14 ... 122 °F]
Option 2	-40 ... +80 °C [-40 ... +176 °F]

The temperature output signal corresponds to the selected medium temperature (see operating conditions).

Output signals

Without temperature measurement	
Standard	4 ... 20 mA (2-wire)
Option 1	4 ... 20 mA + HART® (2-wire)
Option 2	DC 0.1 ... 2.5 V (3-wire, low power) ¹⁾

With temperature measurement	
Standard	2 x 4 ... 20 mA (2 x 2-wire, galvanically isolated)
Option 1	2 x DC 0.1 ... 2.5 V (3-wire, low power) ¹⁾

¹⁾ Shortening the cable always results in a modification of the voltage signal (see accuracy specifications).

Permissible load in Ω

Current output: $\leq (U_+ - (U_{+min} - 0.5 \text{ V})) / 0.023 \text{ A}$

Voltage output: $\leq 1 \text{ mA}$

Additional load of the cable:

$\leq \text{cable length in m} \times 0.084 \text{ } \Omega$

$[\leq \text{cable length in ft} \times 0.0256 \text{ } \Omega]$

For voltage outputs, the load must be specified so that the output current does not exceed 1 mA.

Voltage supply

The power supply depends on the selected output signal and the intrinsically safe electronics (Ex approval).
When being operated in hazardous areas, the submersible pressure sensor must be powered via a repeater power supply (see accessories).

Power supply

Output signal	Standard	With Ex approval
4 ... 20 mA (2-wire)	DC 8 ... 36 V	DC 9 ... 30 V
4 ... 20 mA + HART® (2-wire)	DC 12 ... 36 V	DC 12 ... 30 V
DC 0.1 ... 2.5 V (3-wire, low power)	DC 3.6 ... 36 V	-
2 x 4 ... 20 mA (2 x 2-wire, galvanically isolated)	DC 8 ... 36 V	DC 9 ... 30 V
2 x DC 0.1 ... 2.5 V (3-wire, low power)	DC 3.6 ... 36 V	-

Low power is optimised for the battery operation.

Current consumption

Current output: max. 25 mA per output

Voltage output: max. 5 mA

Reference conditions (per IEC 61298-1)

Temperature

15 ... 25 °C [59 ... 77 °F]

Atmospheric pressure

860 ... 1,060 mbar [86 ... 106 kPa /12.5 ... 15.4 psig]

Air humidity

45 ... 75 % r. h.

Power supply

- DC 24 V with current output
- DC 5 V with voltage output

Mounting position

Calibrated in vertical mounting position with process connection facing downwards.

Accuracy specifications

Accuracy at reference conditions (pressure sensor)

	Accuracy ¹⁾	Non-linearity (per IEC 61298-2) BFSL
Standard	≤ ±1 % of span	≤ ±0.5 % of span
Option	≤ ±0.5 % of span	≤ ±0.25 % of span

1) Including non-linearity, hysteresis, zero offset and end value deviation (corresponds to measured error per IEC 61298-2).

During the adjustment of the voltage signals, the cable length will be compensated. Every shortening of the cable at a later stage results in an offset error of approx. 0.14 % / 10 m [0.13 % / 30 ft].

Accuracy after turndown 5:1 via HART®	
Standard	≤ ±1.25 % of scaled span
Option	≤ ±0.75 % of scaled span

By setting a turndown of greater than 5:1, a higher measuring deviation applies.

Accuracy (temperature sensor)

-10 ... +80 °C [14 ... 176 °F]: ≤ ±1.8 K

-30 ... -10 °C [-22 ... +14 °F]: ≤ ±3.0 K

-40 ... -30 °C [-40 ... -22 °F]: ≤ ±4.5 K

Non-repeatability

≤ 0.1 % of span

≤ 0.2 % of span (with voltage output and cable length > 100 m [325 ft])

Long-term stability (per DIN 16086:2006-01)

Measuring range > 0 ... 0.1 bar: ≤ ±0.1 % of span/year

Measuring range ≤ 0 ... 0.1 bar: ≤ ±0.2 % of span/year

Switch-on time

Output signals without HART®: ≤ 150 ms

Output signals with HART®: ≤ 250 ms

Settling time

Output signals without HART®: ≤ 100 ms

Output signals with HART®: ≤ 250 ms

Overall error

Including non-linearity, hysteresis, zero point and span error, temperature error and temperature hysteresis.

■ Measuring range ≥ 0.6 bar, ≥ 250 inWC, ≥ 10 psi, ≥ 6 mH₂O

■ Measuring range 0.4 bar, 150 inWC, 4 mH₂O

■ Measuring range 0.25 bar, 100 inWC, 5 psi, 2.5 mH₂O

■ Measuring range 0.16 bar, 1.6 mH₂O

■ Measuring range 0.1 bar, 50 inWC, 1 mH₂O

Operating conditions

Ingress protection

IP68

Increased overvoltage protection for lightning strikes (option)

Nominal discharge current: ≥ 10 kA

Rise time: 8/20 μ s

Immersion depth

max. 100 m (325 ft)

Max. tension force of the cable

1,000 N

Weight

Submersible pressure sensor: approx. 300 g [0.661 lbs]

Cable: approx. 80 g/m [0.538 lbs / 10 ft]

Additional weight: approx. 300 g [0.661 lbs]

Permissible temperature ranges		
Medium	Standard	-10 ... +50 °C [14 ... 122 °F]
	Option	-40 ... +80 °C [-40 ... +176 °F]
Ambient	Standard	-40 ... +80 °C [-40 ... +176 °F]
Storage	Standard	-30 ... +80 °C [-22 ... +176 °F]

Explosion protection (option)
